

PROJECT LAUNCH – UPDATE

Tree mapping and biodiversity study

Put yourselves on the map!

Attached is a map showing the number of trees on several properties in Ashton Hayes. This data was compiled at the launch meeting in January. If your property is not included, please can you help your children to document the number of trees less than 50 years old on your property (and your neighbours if they don't object!) and return the map to the school.

If your house is outside Ashton Hayes, please give us the number of trees and your postcode and we shall plot it on our larger map, which we shall display in summer.
