

LAMC NURSES VOTE TO STRIKE BY OVER 90 PERCENT!

The mighty nurses of LAMC have voted by over 90% to join with tens of thousands of Kaiser workers throughout the state in a **one-day strike** at Kaiser facilities throughout California.

The vote of **over 90%** shows Kaiser that LAMC's nurses are unwavering in their commitment to fight against Kaiser's unfair labor practices and their unnecessary and selfish proposal to cut benefits.

"I am proud of LAMC. I love how we come together from around the world. I cherish our teamwork, our committed dedication to serve our patients. Our patients deserve the safest and most conducive healing environment.

And in a prosperous organization like ours, we all deserve to keep our benefits. We are worth it—after all, it's our hard work that brings in Kaiser's profits. United we are here to stay: For strong nursing, for a strong LAMC, and especially for our patients, our members. United we accept no less. No more unfair labor practices, and **no cuts!**"

—Jochen Strack, ICSU

In NUHW and in other unions, more and more Kaiser employees are understanding that the cuts to pensions, healthcare, and retirement that Kaiser has already proposed to some will soon be proposed to all, and that **this fight is all of ours**.

That's why the nurses of LAMC will be out on the picket line along with health educators, dietitians, speech therapists, audiologists, social workers, optical workers, counselors and family therapists, not to mention the 17,000 nurses throughout Northern California in the CNA, who have committed to strike in sympathy. And, again, thousands of Kaiser workers in other unions will be joining our picket lines to let Kaiser know that none of us should have to accept these cuts.

Join us on the picket line.
