

It's time for Doctors Medical
Center San Pablo to

Respect its Caregivers!

*Every time our hospital has needed us,
we've been there.*

Now, while Doctors spends huge amounts of money
on outside consultants, the hospital is proposing
cuts in our health insurance.

We've sacrificed for years to help this hospital.
We deserve a fair contract that respects our work.

“They have money for consultants and executives, but when it comes to our pay and benefits they ask us to sacrifice again.

When it comes to protecting our health benefits, we will not be taken advantage of and we will not be ignored.”

—Venus Calhoun, Unit Assistant, 15 yrs.

We are calling on hospital administration to sit down and truly engage with us and settle a fair contract.
