This exhibition includes some of the most noteworthy artists working today. The rather poetically titled confluence of creativity was organized by Galeria Perdida.

“ Just a few of the artists we’re excited about in this new group show are Danish conceptual artist Joachim Koester, Swedish artist [Fia Backstrom](#) — whose recent work has involved the appropriation of the work of other artists — and Dahn Vo, whose first US solo exhibition *Autoerotic Asphyxiation* was in New York in September, and whose exploration of authorship, authenticity, and identity goes beyond his personal story; Vo, a refugee from Vietnam chanced upon Danish citizenship when his refugee boat was picked up by a Danish tanker. Don’t miss this truly unique assembly of artists. ” - [Rozalia Jovanovic](#)
