Letter of Recommendation Ron Hoehn

I've know Ron Hoehn for about 10 years and have use his services and recommended him highly to other homeowners.

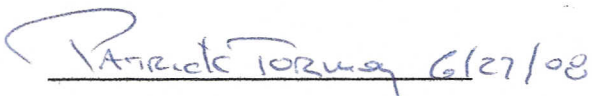

In 1997 or 1998 I hired Ron to repair the sill on my house. Ron's estimate was the lowest and I was impressed that he finished the job for substantially less that he estimated.

As a direct result of Ron's performance on that first task I contracted Ron in 2001 to quote the building of an addition on my house. This was substantial project involving adding two garages and a large single room for my office above the garages. Ron quickly explained how to build an addition that didn't looked patched into an existing building, explaining the lines of the roof and the design or the windows.

From his first sketch through the completed job, Ron built, designed and managed the subcontractors from the driveway expansion to the cement foundation to the shingled roof. Ron's wide and detailed knowledge of construction led to several cost effective recommendations. My wife and I are very happy with the final results.

As a long time friend of Ron's I can fully recommend him for any employment in any phase of construction from initial design through project management and to quality completion.

I know Ron Hoehn to be a skilled and careful craftsman, and an honest hard working man.
