President Obama's speech was generally good. However, he said we needed to move forward with all forms of energy, including nuclear. No we don't!!!! Nuclear power is hugely expensive, dangerous, polluting and carcinogenic. It is terrible that Pres. Obama and Energy Secretary Chu are pushing for loan guarantees for nuclear companies! This is unwise, short-sighted and smacks of kow-towing to nuclear campaign contributors, and to Jeff Immelt of GE rather than setting sound national policy!

Lee Evans, Chair: Sierra Club of CT: Anti-Nuclear Committee (Jan. 26, 2011).
