URANIUM?
LEAVE IT IN THE GROUND!

A FILM SCREENING & DISCUSSION
ABOUT URANIUM MINING

Join the discussion with experts and activists
fighting the Nuclear Fuel Chain from Cradle
to Grave. What can we learn from the
history and what is at stake with uranium at
this moment?

Film: The River That Harms
(Dir. Colleen Keane, 45 mins, 1987, United States)
This film documents the largest radioactive
waste spill in U.S. history - a national tragedy that
occurred on Diné (Navajo) lands that received
little attention. With the sound of a thunderclap,
94 million gallons of radioactive waste broke
through a United Nuclear Corporation storage
dam in 1979 and poured into New Mexico’s
Puerco River, the main water supply for the Diné
people and a tributary of the major source of
water for Los Angeles, California. To the Diné
people, this event impacted their lands, their
health and their economy and sends a prophetic
warning for all humanity.

SUNDAY NOV. 16
7:00PM-9:00PM

AT BUSBOYS & POETS (5TH & K)
10255THST, NW WASHINGTON, DC 20001
METRO: GALLERY PLACE/CHINATOWN

FREE
DONATIONS ARE GREATLY
APPRECIATED TO SUPPORT
ANTI-URANIUM ACTIVISM
ON THE GROUND!
