RE: License Application of Interim Storage Partners LLC, Docket 72-1050, and License Application of Holtec, Inc., Docket 72-1051, for a Consolidated Interim Storage Facilities

Dear NRC Chairman Christopher Hanson, and Commissioners Jeff Baran, and David Wright,

As Texas State Legislators, we join Governor Abbott in strongly opposing Interim Storage Partner's application to store high-level radioactive waste in Texas. Interim Storage Partners (ISP) is a joint venture of Waste Control Specialists (WCS) and Orano.

Holtec International proposes a similar facility in nearby New Mexico. Both projects are illegal under the Nuclear Waste Policy Act since no U.S. repository exists. Both would result in transport of radioactive waste through Texas. Both licenses should be denied. Bringing this nuclear reactor waste to Texas and New Mexico would result in dangerous de-facto permanent dumps.

Governor Abbott has expressed concerns about potential impacts to the Permian Basin, the world's largest producing oilfield. Abbott said the region would become a "prime target for attacks by terrorists and saboteurs. This location could not be worse for storing ultra-hazardous radioactive waste... I urge the NRC to deny ISP's license application."

If licenses are issued, thousands of rail shipments of spent nuclear fuel and Greater-Than-Class C radioactive waste would occur, travelling through major cities throughout the nation and the state of Texas. Accidents, leaks or sabotage could result in remediation costs of up to \$648 billion. Resolutions opposing consolidated interim storage and nuclear waste transport were passed by five Texas counties and three cities, as well as the Midland Chamber of Commerce. Collectively this represents the voices of 5.4 million Texans.

Storing high-level radioactive waste in Texas or New Mexico would be especially risky due to temperature extremes, wildfires, lightning, flooding, and intense winds. The region is prone to sinkholes and earthquakes. In fact, Andrews County was the epicenter of a 4.7 magnitude earthquake in 1992. Contamination of the Ogallala Aquifer that lies near the WCS / ISP site could imperil drinking water and food production.

We do not consent to having our state become a nuclear waste dumping ground. Please prevent nuclear disasters that risk the health and safety of Texans and imperil our businesses and economy. Please deny the ISP and Holtec International licenses for Consolidated Interim Storage of high-level radioactive waste in Texas and New Mexico.

Sincerely,
