

KEVIN KAMPS is a longtime leading opponent of government and industry efforts to dump nuclear waste at Yucca Mountain, Nevada. Kevin also has extensive knowledge about the risks of radioactive waste generation and storage at reactor sites, and transportation through communities across the country. In addition, Kevin focuses on eliminating federal subsidies for new reactors and other wasteful nuclear projects such as reprocessing. Prior to joining Beyond Nuclear he was for eight years the Radioactive Waste Specialist at Nuclear Information and Resource Service. Kevin has traveled to Chernobyl in Ukraine and founded a Michigan chapter of the international Chernobyl Children's Project, which brings child victims of the Chernobyl accident to the United States for medical help. He has also worked with radiation victims in the U.S. and Canada, including those living near uranium mines and downwind from the Nevada Nuclear Weapons Test Site. Kevin has addressed communities in the U.S. and overseas, as well as governmental forums and federal, state, and local government agencies. Kevin is a Michigan native.
