

Introducing DSI RF Systems

Your partner in maintaining your broadcast facility

DSI RF Systems has been serving the broadcast community for 25 years with a broad range of products and services.

To mark our Silver Anniversary, we're proud to introduce a dedicated service team to help you keep your broadcast facility in top shape and prevent costly, unexpected repairs.

From transmission system consulting and design, through transmitter and antenna installation and emergency repair services, **DSI** is the company to call when you need a reliable, extra set of hands for your broadcast station.

A service contract with **DSI** can ensure that your transmission system is regularly inspected with faults identified and repaired - before they become big problems.

DSI has the equipment and human resources to get your job done right. We maintain a highly trained staff of broadcast engineers, installers and climbers with hundreds of years of combined broadcast experience. Our extensive insurance coverage ensures that you can sleep at night, knowing that the team working on your facility is protected. And since we know that everyone's facility is different, **DSI** can provide a solution that can work within your budget.

Satisfied clients from around the country such as ABC, NBC, Time Warner and CBS Radio have trusted **DSI** with their RF and transmission projects.

So, if you're looking for help with:

- Transmitter facility preventative maintenance and emergency repairs
- Satellite dish installation or antenna peaking
- Transmitter installations
- Antenna installation or relocation
- Microwave system servicing
- Facility construction
- Vacation coverage
- Technical consulting
- Completing an in-house project

...there's only one call to make!

For more information, please call Ron Yurman, Senior Vice President of Service today at: 732-563-1144 or email: ryurman@dsirf.com

DSI RF Systems . . . We're ready to help!
