

Jackson, New Jersey

Job Type:

Remote Camera installation
on a roller coaster

Industry:

Television Broadcast

Scope of Work:

Install Remote Camera
Spec & manufacture cable harnesses
Create stable mount for camera

Project Details

The sole purpose of this camera system is to deliver exciting shots of the roller coaster riders and footage of the crowds at the amusement park in Jackson, NJ.

A strategic partnership was created where both parties, the local tv station and the amusement park, benefit from the use of remote camera systems.

The local station gains use of a camera in a unique location, otherwise unavailable to their competitors, enhancing their news broadcasts. The amusement park, who provides a facility for the unique installation, benefits from air time.

This is a business structure that can be recreated in any tourist related location. The flexibility of our intallation crews, allows for unique installations in amusement parks, resorts, ski areas, boardwalks and rooftops.

on the camera system

Challenges

Uncommon Installation Site

Solution

While this particular job posed no strong challenges for our seasoned installation crews, the out-of-the-ordinary site, did require a through mechanical and engineering evaluation prior to defining and creating the mounting structure.
