

MS Project JDE Adapter

BUILDING BUSINESS MOMENTUM

Solution Features

- Wizard Setup
- Bidirectional - 5 touch points
- Uses standard APIs - no customizations
- Integration with Engineer to Order Job Scheduling

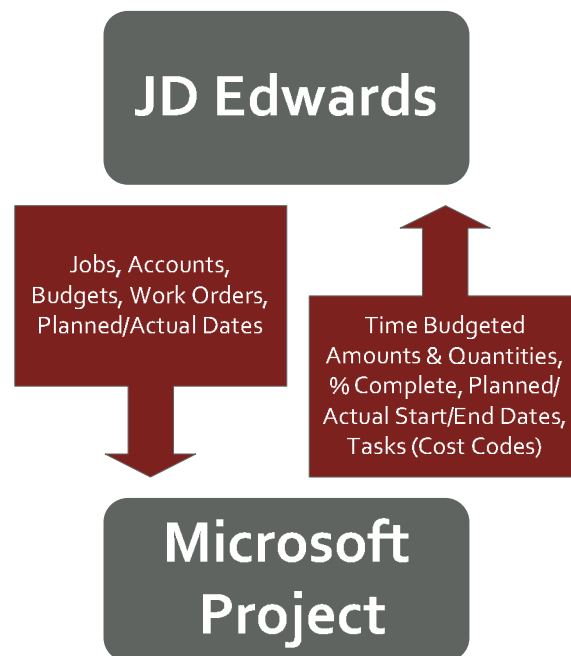

Solution Benefits

- Streamline decision making
- Eliminate duplicate entry
- Improve lump sum, % complete tracking in JDE
- Reduce project risk

Requirements

- EnterpriseOne Xe or greater
- Microsoft Project 2000, 2002 or Professional

Extend the power of JDEdwards to project managers who use Microsoft Project to manage jobs and projects.

Streamlined Setup

- Import Job Details into Project from JDE
- Set up and update time schedules for tasks in Project and export to JDE
- % Complete can be tracked by task in Project and exported to JDE to update Job Cost Information
- Perform time budgeting to distribute costs across a range of tasks in Project and export to JDE
- Create new tasks in Project and update JDE Cost Codes
