for Renewable Energy Standard compliance

### Program Progress

---

	# of Projects	Capacity (MW)
Online	52	62
<u>Pending</u>	<u>19</u>	<u>29</u>
TOTAL	71	91

**Berkeley Lab** released a nationwide review of eleven procurement programs targeting small renewables, including the Standard Offer Program. The report was a vote of confidence for the Standard Offer Program, finding that it aligned favorably with similar programs, both in its design and implementation.

---

### VT Tech Site Visit

**Vermont Technical College** was the site of a VEPP Inc. Board of Directors visit to the Standard Offer Farm Methane Project on campus. The VEPP Inc. Board includes utility, producer, and public representatives.

---

**Lyndonville West & Lyndonville East**, 480 kW & 495 kW, were officially commissioned. Both projects are located in Lyndonville, Vermont. These are the first utility sponsored projects to be constructed under the Standard Offer Program.

**MartinBrook Solar**, 2.1 MW, was officially commissioned in December. Located in Williamstown, Vermont, this was the third Standard Offer Project to be commissioned in 2018.

---

The Standard Offer Program was established by the Vermont Legislature to promote the rapid deployment of small renewable energy projects.
