2. Various State Department of Corrections Websites (see validation notes below)

### Data Overview

The data set includes information contained in the ACA 2010 Directory (henceforth, ACA directory). Trained researchers used the ACA directory to enter data pertaining to the location and characteristics of all adult facilities listed for state, federal, contract/private, community corrections, Native American, and Military groups. Juvenile facilities and military facilities overseas are not included in the dataset.

Overall, there are 1,665 facilities include din the dataset.

The physical address was then validated through several different methods. In some cases, facilities were contacted directly via telephone. For others, the relevant state department of corrections was contacted to obtain physical addresses.

Physical Addresses were then entered into Google maps and satellite imagery was used to verify the correct latitude and longitude of the facility.

### A Note on Native American Facility Addresses

The addresses provided for many Native American facilities in the ACA directory are post office boxes. As such, it is difficult to locate these facilities even when viewing satellite imagery on Google Maps. In these cases, latitude and longitude coordinates are obtained for the approximate centroid of the city or reservation property the facility serves.

Users of the data should not assume the lat/lon coordinates in the dataset represent the actual geographic location of the correctional/detention facility. Please refer to the Address Validation Notes below, to confirm any assumptions or adjustments used in obtaining the latitude and longitude coordinates.
