President's Message
Brent Long

As we near the end of our 2014-2015 calendar years, I find myself reflecting on all that has happened in our chapter over the past couple of years. I see a vibrant chapter that is committed to promoting our industry and active membership that has nurtured not only networking opportunities, but mentoring, friendships and increased camaraderie. We have had many programs, outings, meetings and events this year; and I would like to extend heartfelt thanks to your Board of Governors for all their work this year.

The quality of our technical programs continues to draw large numbers of participants, both local members and allied professions. We thank you for your interest in our programs. We have two more programs before we close the year – one luncheon and a technical tour on refrigeration.

We continue to promote our industry through fundraisers, as well. In late April, we had our 1st Annual Sporting Clays event, benefiting our Scholarship Fund. The event was very well attended and raised valuable funds so that we can maintain two annual scholarships for aspiring engineers: one for students entering school for the first time this fall and a second for returning engineering students. I would like to extend congratulations to your CTTC chairman and his committee for organizing this event so successfully. No doubt this will become one of our chapter’s premier annual events! Please mark your calendars for our golf outing, to be held at Bent Tree Golf Course on Friday, September 11, 2015.

I’d like to take a moment to thank our local membership for continuing to be such a strong group. Your participation and commitment to our industry and ASHRAE promotes our work to a much broader audience than most would imagine. I’d also like to thank all of the members of the Board who have volunteered much of their time to organize events, keep our membership strong, raise money for Research Promotion and Scholarships, and so much more.
AspectFT® Wins 2015 AHR Innovation Award for Building Automation

The FIRST BAS platform to automatically build an HTML5 user interface for accessing trends, setpoints, and other valuable data on your computer or smart device without additional plug-ins or engineering time. AspectFT utilizes industry standard technology like Twitter®, RSS, email, Google Calendar™, Microsoft® Outlook®, and Apple® iCal® to integrate your buildings to your world.

Through compatibility with common web platforms, you can access your building in a variety of ways from a variety of devices. In many cases AspectFT will integrate with your current computer or smart device through programs already on those devices. With just a few extra steps, new points can be added, for fast and convenient data acquisition.

**HTML5 is available for all AspectFT 2.0 solutions.**

AspectFT can also push valuable facility data to our cloud-based software Voya™ Xplor; delivering centralized energy monitoring, facility analytics, and energy management tools to implement conservation measures and proactively reduce energy consumption.

The Benefits of Active Energy include:

- Save up to 25% on your energy consumption
- Typical ROI is 2 years, but can be as little as 6 weeks
- Extended monitoring and control helps you pinpoint and eliminate wasted energy
- Maximize the efficiency of your BAS immediately and over the longer term
- Supports the achievement and maintenance of EN16001 and ISO 5001 Energy Management Standards as well as LEED Standards, and corporate social responsibility compliance
- By encouraging behavioral change, you can save an additional 10% on your energy consumption

To learn more about how AspectFT can help you save time, energy and money, visit: [www.aamatrix.com/aspectft](http://www.aamatrix.com/aspectft).

American Auto-Matrix and AspectFT are registered trademarks of American Auto-Matrix. Voya Xplor is a trademark of Cybox Controls, LTD. All other trademarks listed herein are properties of their respective owners.
Research Promotion News
Tony DeCrescenzo

Only 2 months remain in this year’s research promotion campaign. To date, we have raised $11,258 and are close to our goal of $12,500. For those who have pledged to the campaign, we greatly appreciate your support. If you have not donated, we ask that you consider making a contribution. The money that is raised goes towards funding more research projects. Many of those projects are located in our region and some are in Ohio. The research is critical to the advancement of our industry, creating more opportunities for all of us to live, work, and play in a more comfortable and sustainable environment!

To make a donation, please visit: www.ashrae.org/contribute. Please contact me at 614.404.8669 if you need any assistance.

Membership Promotion
Jake Taylor and Sam Allen

Scholarships!

The Columbus ASHRAE Chapter is excited to announce that two (2) scholarships will be award this year, one to a high school senior and one to a college student, interested in the HVAC field.

Please help spread the word to any students, interns, or co-ops that you may know and would benefit from $1,500 scholarship.

Applications must be received by May 31st and scholarships will be awarded June 30th! Scholarship awards will be issued directly to the school of study and not the individual.

Please find more information on the website here:

SERVING THOSE WHO SERVE OUR COUNTRY

AECOM is serving those who serve our country through our work on buildings like the Veterans Affairs Replacement Medical Center in Louisville, Kentucky. This $710M project will provide veterans with a full-service, state of the art hospital and ambulatory care center.

The new consolidated campus will be located on a greenfield site, which will allow for the incorporation of healing gardens and veteran memorials. The mission critical facility will be designed to support state-of-the-art healthcare services, research, veteran benefits administration, and parking. The new campus will meet the US Green Building Council’s (USGBC) LEED Silver rating with renewable energy features and a central cogeneration plant.

This project was engineered in Columbus, Ohio.

AECOM, recently joined by URS, is now a single company like no other. AECOM, named to Fortune’s 2015 World’s Most Admired Companies, is a great place to work and grow.

A Note from your CTTC Chairmen:

Hanse Cromer

2015 has brought a number of great speakers to the Grange Audubon Society. We have averaged 80 to 90 attendees. In March we were graced with a visit by the President of ASHRAE, Thomas H. Phoenix. Thomas spoke about People, Passion & Performance and the current state of ASHRAE. In April we had a visit from ASHRAE Distinguished Lecturer Steve Hamstra, who gave a fantastic lecture on “How to Kill Geothermal Systems”. May meeting will have Dylan Matthews from AEP speaking about the “AEP Ohio RCx Program and how to become a program-approved service provider.

April 23rd was the ASHRAE Webcast, we had 16 attendees. Thanks to Casey Kapustka for managing the event and a Special Thanks to Refrigeration Sales for the use of their facilities.

April 24th was the inaugural ASHRAE Columbus Chapter Sporting Clays Event. The event was to raise money for the ASHRAE Columbus Chapter Scholarship Fund. 62 attended a great day at the range. The event was held at Black Wing Shooting Center and featured a number of side games, such as, Pistol Poker, 5 Stand Shooting and Crazy Bird. Attendees walked a sporting clays course and tried their skills at shooting 50 clay birds. A special thanks goes out to Ron Engstrom and Carl Shultz for helping me organize a great event. Thanks to all who participated, you raised approximately $2400 for the scholarship fund!

Congratulations to Team Guy who had the best overall score:

Team Members: Greg Guy
              Kurt Schmitt
              Mike Pitzo
              Chris Gleich
The Habegger Corporation mission is to be a customer oriented, successful manufacturer’s representative and distributor of heating and air conditioning products. Our goal is to be the recognized leader in the markets we serve while conducting our business according to the highest ethical standards. We will achieve our goal by providing quality products, outstanding service to our customers.

Design, Sales, and Post-Sales Support

Thank you for making the ASHRAE Columbus Chapter Sporting Clays Event such a success!
Heat waves? Bring ‘em on. Storms? Piece of cake. Tower fan failure? No problem. The AquaEdge™ screw chiller with Greenspeed® intelligence from Carrier is engineered to thrive in situations other chillers can’t survive. With surge-free performance, variable-speed range twice that of other chillers and a unique compressor design that minimizes the need for scheduled maintenance. Oh, and it’s remarkably quiet next to comparable centrifugal chillers.

Day in, day out, no chiller keeps its cool quite like the AquaEdge chiller.

For all your building design needs, visit carrier23xrvchiller.com.

*Among electric-driven, water-cooled chillers as measured by IPLV conditions reported by the DOE/FEMP EnergyEfficiency Study
**0.299 kW/ton on select models.

**Student Activities**
Matt Colvin

The Columbus Chapter ASHRAE board would like to thank all who helped contribute to the future generations of engineers. We have established two scholarships that will be awarded by next month and have plans to aid an even greater amount for the future scholarship recipients. The OSU student chapter of ASHRAE has been re-established this year and we look forward to getting them more involved. The Columbus State and Ohio University are both actively trying to get the required amount of students to join in order to set up their ASHRAE student chapter. Our local ASHRAE chapter has participated in a STEM Expo which reached more than 100 young minds, participated in a Northland High school job fair, and plan on participating in an even larger STEM expo the end of this summer. If any local members are interested in getting more involved with our Student Activities committees or events please let us know and we would truly appreciate the help or ideas.

If you are interested in similar opportunities please contact mcolvin@steffens-shultz.com.

**Young Engineers in ASHRAE**
Andrew Stotz

The YEA will be sponsoring a technical tour of the Anheuser-Busch brewery on Wednesday, May 20. This private tour will present the Brewery’s 1 million+ SF of total building area including the diverse and complex refrigeration, mechanical, and processing systems. The brewing process and packaging areas are two areas which will be highlighted, but we are limited to 40 people for the tour. All registration fees collected will go towards ASHRAE Research Promotion.

Since the brewery no longer allows beer tasting as part of their tours, all are invited to a happy hour @ the Winking Lizard Crosswoods location. All members, not just tour participants, are welcome to join for happy hour around 7pm.

For more information please contact Andrew Stotz (andrew_stotz@trane.com)

Trane® Advantage VRF™
Variable Refrigerant Systems

IT HEATS AND COOLS.  IT COOLS AND HEATS.

More individualized comfort.
Simultaneously heats and cools different rooms in the same building.

More energy efficiency.
Up to 27 IEER and up to 30 SCHE—more than any other system.

More options for more buildings.
Fits historical sites, new construction, schools, offices and more.

More piping capacity.
Up to 360 feet—twice the maximum of competing systems.

MORE TRANE. MORE GAIN.

Get all of the hot and cold facts on Trane Advantage VRF systems by scanning the code or visiting Trane.com/VRF.
