

DataCycle MyVision Overview

Easy-to-use Web portal for reports and dashboards created in DataCycle Reporting

DataCycle MyVision is an easy-to-use Web portal for running and sharing graphically rich Excel, PDF or HTML reports and dashboards. DataCycle MyVision is an optional feature available for DataCycle Reporting from ApeSoft.

Web access for all of your Excel

DataCycle MyVision gives you Web-based control over your Excel reports.

Users can easily run on-demand reports with the parameter-based report builder. Reports run with DataCycle MyVision can be securely shared with employees, customers or partners. And, of course, this is in addition to the benefits of the powerful, Excel-based

Get started today

By adding DataCycle MyVision to your DataCycle Reporting environment, you can have Web access to all of your Excel reports – within hours.

Direct access to Excel reports through any Web browser. DataCycle MyVision gives users the control they need – to run on-demand reports and to access reports created in DataCycle Reporting.

Parameter-driven online report and dashboard execution. DataCycle MyVision guides users through a simple reporting workflow. In just a few simple steps, users can choose the parameters they want, run reports on-demand and distribute reports to colleagues.

Easily integrate with your intranet or customer portal. DataCycle MyVision extends your reporting platform to employees, customers and partners through your existing intranet or extranet. It easily connects with virtually any Web server platform.

Secure, personalized data access by user profile. Users can only see what they are authorized to see.
