LEED Credits

Credit 6 - **Rapidly Renewable Materials**

Requires use of rapidly renewable products & materials (made from plants harvested within a 10 yr cycle or shorter) for 2.5% of the total value of all building materials & products used on the project.

Credit 4.1 - **Low Emitting Materials: Adhesives & Sealants**

This LEED credit seeks to reduce the concentration of indoor air contaminants that are odorous, irritating and/or harmful to the comfort and well being of installers and occupants.

Credit 3.2 - **Construction Indoor Air Quality Management Plan – Before Occupancy**

Intent – To reduce indoor air quality (IAQ) problems resulting from renovation and promote the comfort and well being of workers and occupants.

UltraplyXL® is also AFS / 01-10-01 & PEFC / 32-11-1 certified as a green product.

Moreland Company USA as a company carries FSC Chain of Custody by SmartWood FSC – ACC – 004
