

FenceScape®

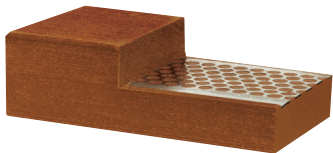

Looks Better.
Lasts Longer.™

Beautiful, Low-Maintenance Composite Fencing

A fence is the most visible extension of a home. And with FenceScape you don't have to sacrifice beauty to get quality. You get the best of both worlds. FenceScape provides the look and feel of wood with the low maintenance benefits you expect from composites. There's no painting, staining or sealing, and FenceScape won't split, rot, warp, crack, splinter or suffer termite damage. Available in a rich, warm, beautiful Mountain Cedar color, FenceScape composite fencing will look new, year after year.

State-of-the-Art Technology

FenceScape's rail contains a honeycomb of galvanized steel that provides strength to help prevent the potential creep experienced with temperature changes or long-term load. This patent-pending technology results in a fence with unparalleled strength and beauty. FenceScape also uses state-of-the-art technology that reduces its weight while maintaining its durability. A FenceScape fence board is about 30-40% lighter than a traditional solid composite board.

Wood-like Versatility

Featuring a rich, warm Mountain Cedar color, FenceScape offers a full product line with components sold separately. This gives you the same design versatility as wood, and no special tools or fasteners are required.

Why FenceScape®?

1

Low-maintenance

- No painting, staining, or sealing required
- Won't split, rot, warp, crack, splinter or suffer termite damage
- Contains UV-inhibiting pigment for minimal fading
- Adds value to your home by increasing overall home investment

2

Looks and installs like wood

- Its natural wood pattern is specifically designed to minimize repetitive patterns
- Offers the same design diversity as traditional wood
- Beautiful from all angles, every fence is a good neighbor fence
- Explore the opportunities:

3

Easy installation

- Installs quickly and easily like wood or vinyl, with no special tools or fasteners required
- Follows the contour of the terrain to offer full privacy and complete containment
- Allows for easy gate installation

4

A name you can trust

TimberTech, the company that brings you the highest quality, most innovative composite decking and railing solutions on the market, is proud to offer FenceScape. TimberTech's experience in the composite decking and accessories industry, together with its state-of-the-art fencing technology, puts FenceScape in a class of its own!

TimberTech is committed to being a leader in the decking, railing, and fencing industry, while integrating sustainable practices into three key components of our business.

Clean Manufacturing:

- Waste Management: Minimize waste in all facets of our business.
- Energy Efficiency: Minimize energy consumption, while striving to convert energy used into renewable sources.
- Water Efficiency: Reduce our impact on local water supplies through responsible use and disposal.

Product Development: Incorporate as many sustainable materials and processes into the products we manufacture without sacrificing quality.

Community Involvement: Be a leader in the local community on sustainable practices, charitable contributions and involvement.

5

Warranty

FenceScape is backed by a 25-Year Limited Warranty for residential applications and a 10-Year Limited Commercial Warranty. FenceScape products are made exclusively from a technologically advanced composite material especially designed to provide years of low-maintenance use and enjoyment. That's because FenceScape is guaranteed against termites, decaying, checking, rotting, splitting and splintering.
