

Dolores Koontz, CAOHC is our professional, occupational-hearing conservationist. Dolores is an expert in all aspects of occupational-hearing conservation. So, if you would like to learn about

Prevention of employee-hearing loss in high-noise, industrial environments

- Complying with OSHA regulations — your risks and obligations
- Hearing-conservation programs — components, steps to take, managing, costs

Industrial-noise assessment

- Identifying high-noise areas and equipment
- Identifying employees at risk

Onsite-hearing screenings

- Establishing baseline hearing values for employees
- Identifying employees with below normal hearing
- Planning ongoing testing for employees exposed to high, industrial noise
- Costs and scheduling

Employee-hearing protection

- Choices
- Comfort
- Costs
- Proper use and care

Designing a comprehensive, occupational-hearing conservation program...

Please email [Dolores](#) or call her at 708-599-9500, Ext. 22. She will answer your questions, help guide you through OSHA regulations, and review with you our occupational-hearing-conservation programs.
