

## 3D Systems (DDD)

Today's *Trade of the Day* is 3D Systems (DDD), which closed yesterday at \$32.99. Our target price on the trade is \$38.50, while our stop price is \$27.40. 3D Systems develops, manufactures, and markets solid imaging systems designed to rapidly produce three-dimensional objects from computer-aided design and manufacturing-generated solid or surface data. The company utilizes its systems to produce models, engineering prototypes, mold patterns, and other parts using CAD/CAM or other data supplied by its customers.

DDD has been in our Bespoke 50 list of top growth stocks for some time now, and it has been trading in a strong uptrend throughout the entire year. Each time it has pulled back to its 50-day, it has bounced nicely back towards the top of its uptrend channel. The stock has pulled back from a recent high over the past few trading days, and this morning it is set to open lower by about \$0.75-\$1.00. We believe this offers up a solid entry point for a trade on the long side.
