Rob,

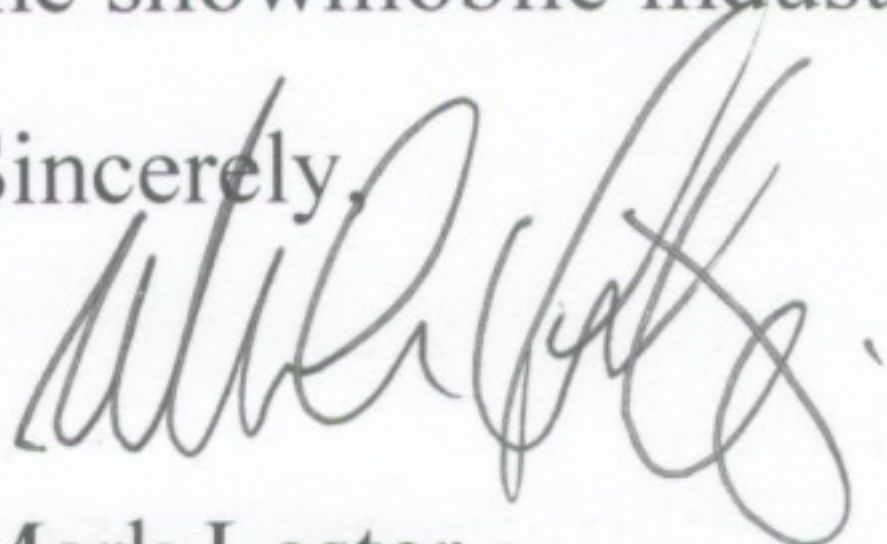

Just wanted to drop you a note and offer my congratulations on the successful granting of a Canadian Patent for your revolutionary new snowmobile ski design.

It is with a measure of pride and satisfaction that we at Supertrax International Magazine – the largest audited circulation snowmobile enthusiast title in the US and Canada and a wholly owned by Canadians business - see yet another great idea coming from a fellow Canadian.

It's been both interesting and exciting to have the opportunity to work with you on the validation of the ski. To say it is unique is a huge understatement. Based on looks alone the ski is literally dripping with appeal and bonafide sizzle. Of course the function of the "dual blade" design is what really sets the ski apart. I was both shocked and pleased to experience the ski myself. Others on our staff came to the same conclusion – you've got something here which will improve and further both handling and control on most modern snowmobiles.

Again, way to go and keep on pushing forward with your design. It's got great potential to re-write the rules and carve out a new identity for itself in the snowmobile industry.

Sincerely,

Mark Lester
