

WATER WELL DRILLING

The primary work of our ministry is to provide a source of clean water to rural villages by drilling and constructing water wells.

- TWM has three rigs and supporting drilling accessories in the El Paraiso department of Honduras.
- Each mission trip focuses on drilling a water well for a village in need.
- Our trained Honduran crew continues to drill during the year with our financial support and technical advice.
- TWM has drilled 59 wells in Honduras since 2003

Drilling with our medium sized rig, the DR-130

Our larger rig, the T-4

Drilling with the DR-20, our smaller rig
