

Personalized Respiratory Care

What makes Down East Respiratory so special with patients? Personalized care that's second to none. We listen to our patients' families and respond in a trustworthy, highly skilled manner. At Down East Respiratory, we pride ourselves on the fact that we are an extended member of the patient's family. We provide services that often allow patients to stay in their home environments, lessening the trauma of hospital stays.

As only one of a few such services in the state, Down East Respiratory Services has been providing respiratory care to several North Carolina counties for over 15 years. In addition to homebound patients, Down East Respiratory provides respiratory care to schools, Child Development Centers and Daycares.

Our specialty is providing respiratory care to pediatric patients. Focusing in early intervention, we believe that successful pediatric therapy often means providing care in the right environment. That's why we recommend services before, during, or after school or daycare, which can either be provided on-site, or at home. This reduces the number of pulmonary infections, emergency room visits and hospital stays for respiratory related illnesses.

Among the pediatric services we provide are for children who suffer from asthma, cystic fibrosis, bronchial pulmonary dysplasia, reactive airway disease, and tracheostomy patients, as well as multi-handicapped children, such as cerebral palsy, spinal muscular atrophy and other respiratory related symptoms. We provide free screenings for all pediatric disorders and offer comprehensive assessments. We will design a complete plan of care for any patient that has recurrent respiratory tract infections and problems.

Fees, Payments & Insurance

Down East Respiratory collects no payments for respiratory services of any kind from the patients. As a benefit to our patients and their families, we charge their insurance company and accept only what they pay. We file Medicaid, or any third party insurance claims directly or through associated care providers. Fees are charged on the basis of services provided and the time required to provide them. A fee schedule is available upon request.

Contact Us

If you feel that your child or patient could benefit from our services, please call us at 252-830-2094. Or if you prefer, fill out the information below and fax to our office at 252-355-7358, or mail form to:
