

## Our Mission

**OT 4 KIDS** is dedicated to providing the highest quality therapy services for exceptional children to ensure the greatest independence and success in everyday life.

**"EXCEPTIONAL KIDS DESERVE EXCEPTIONAL CARE"**

## Our Services

**OT 4 Kids** provides **occupational, physical, and speech therapy** to children with special needs.

Treatment Techniques Include:

- Oral Motor and Feeding Therapy
- Fine Motor Treatment
- Sensory Integration Techniques
- Neuro Developmental Treatments
- Floortime Strategies

Intervention is provided in two ways to achieve the greatest improvement in the child's future.

1. Providing direct occupational, physical and speech therapy intervention.
2. Educating parents and caregivers to provide a therapeutic environment that provides the best opportunity for success.

## Our Clinic

**OT 4 Kids** has a modern clinic. Come see our therapy rooms.

**Gym:** This "indoor backyard" provides endless opportunities (like the zip-line, bounce house and playground) to help increase coordination, gross motor skills and balance.

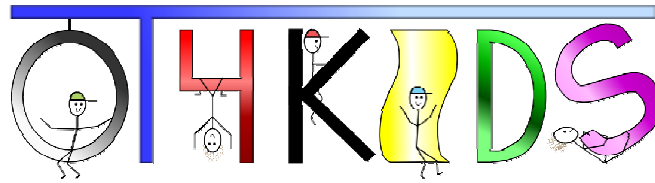

**Sensory:** Provides a safe, calm environment to help the child "calm down" using various appropriate sensory facilitators such as dim lights and a waterbed.

**Swing:** Allows the child to receive the vestibular input needed through the use of different equipment, for instance, the platform swing, bolster swing, and the inner-tube swing.

**Kitchen:** The kitchen provides a natural setting to facilitate competence and independence with feeding to help improve oral motor skills using various adaptive feeding equipment and oral sensory strategies.

**Fine Motor:** This quiet area encourages focus on improving handwriting, cutting, keyboarding, finger dexterity and manipulation skills.

**Multipurpose Room:** Areas in this room provide opportunities to improve self-care skills and body awareness. Specialized exercise equipment encourages improvement with strength and coordination.

## Our Experience

**OT 4 Kids** has a staff of pediatric therapists and assistants who have many years of experience and special training in the following areas:

- ❖ Sensory Integration Dysfunction
- ❖ Beckman Oral Motor Assessments
- ❖ Therapeutic Listening Program
- ❖ Feeding Dysfunctions
- ❖ Neurodevelopmental Treatments
- ❖ Floortime Strategies for children with Autism
- ❖ Sensory Based Feeding Program

**NEW!**

- ❖ CranioSacral Therapy (CST)

A light-touch approach that can create dramatic improvements. It releases tensions deep in the body to relieve pain and dysfunction and improve whole-body health and performance. CST is an effective additional treatment Autism, Sleep Disorders, ADD / ADHD, Cerebral Palsy, Neurological Conditions, and many other conditions. *Private pay only.*
