

Dear Medicaid Beneficiaries, Advocates and Other:

Lewis County General Hospital is part of a Performing Provider System (PPS) under New York State's Delivery Reform Incentive Payment (DSRIP) program. DSRIP focuses on health care system transformation, where providers work to improve and coordinate community based, primary care, mental health and preventative care services. The lead PPS organization in our area is Central New York Care Collaborative, Inc. (CNYCC).

We participate in certain DSRIP projects in the CNYCC PPS, including the following:

- ED care triage for at risk population
- Care transitions intervention model to reduce 30-day readmissions for chronic health conditions
- Implementation of patient activation activities to engage, educate and integrate the uninsured and low non-utilizing Medicaid population into community based care
- Integration of primary care and behavioral health services
- Strengthen mental health systems
- Behavioral health community crisis stabilization services
- Evidence-based strategies for disease management in high risk, affected populations- cardiovascular care
- Integration of palliative care in patient centered medical home
- Reduce pre-term births
- Health home at risk intervention program
- Create an integrated delivery system-focused on evidence-based medicine and population health management
