## HAZMAT SPILL SITE

Methuen, Massachusetts

Fieldstone Land Consultants PLLC (FLC) is pleased to have worked with Haffner's Oil Company and MassDOT at a fuel oil spill site located at the intersection of MA Routes 213 and 28 in Methuen, Massachusetts.

This project was the result of an accident involving an overturned fuel delivery truck. Fuel oil leaking from the truck contaminated the surrounding area and subsequently was removed along with existing site features such as soil, curbing and asphalt.

Services for this project included horizontal and vertical control tie-in to MassDOT project no. BR-001S (723). Emergency construction layout of line and grade was performed for the reestablishment of the edge of pavement and other highway features.

Site features were restored to pre-spill conditions and finished in a timely manner.

Please feel free to contact Pat Quinn of Haffner's Oil and Propane for a reference.
