Interested in a Nonprofit Career?

As part of its upcoming conference, Democratizing Technologies: Assessing the Roles of NGOs in Shaping Technological Futures, the NSF Center for Nanotechnology in Society at UCSB is hosting two events targeted specifically at undergraduate and graduate students considering careers in the nonprofit sector. In a Friday afternoon panel, nongovernmental organization (NGO) leaders will discuss the skills they seek when hiring employees. Afterwards, conference attendees will have the opportunity to speak directly with local and international NGO representatives in a casual reception setting. Over 20 organizations will be on hand to present tabletop demonstrations and to chat. Beverages and hors d’oeuvres will be provided along with live music. These events are free, but if you plan on attending, please register on the conference website (www.cns.ucsb.edu/demtech2014/registration).
