Survey Shows Support for the Hospital Executive Compensation Act

Richard A. Robbins, MD
Editor, SWJPCC

The Arizona Hospital Executive Compensation Act 2016 was an Arizona state proposition to limit healthcare executive pay to $450,000/year. An anonymous survey conducted by the Southwest Journal of Pulmonary and Critical Care (SWJPCC) from 8/1/16-8/22/16 on support for the proposition support and its possible effect on healthcare (Appendix 1). We obtained 52 responses of which 49 were from physicians and 3 from other healthcare workers. Eighty-three percent (43 of 52) supported the proposition and only 10% (5 of 52) felt it would make patient care worse. Thirty-five percent (18 of 52) felt it would make patient care better while the remaining 56% believed it would have no effect. All 5 of those who opposed the proposition felt it would make healthcare worse. These data suggest that in the opinion of those who answered a survey in the SWJPCC the vast majority supported a measure to limit healthcare executive pay and most felt it would have no effect on patient care or make it better.
