Chapter 1 – The View From Walden
1. What question did Thoreau ask that Cronon is dealing with? p. 5
2. What types of evidence are used? p. 6-8
3. What kinds of difficulties does Cronon identify? p. 9
4. Did European settlement cause all the environmental changes in New England? p. 9
6. What is the relationship of culture and ecology? p. 13
7. What is the task Cronon sets before the reader? p. 15

Chapter 2 – Landscape and Patchwork
1. Initially, what areas of New England were Europeans familiar with? p. 19
2. How did the landscape appear different, and why? p. 20
3. What stood out to Europeans once they arrived in New England? p. 22
5. What stood out about bogs for the colonists? p. 28
6. Why was fire significant? p. 30
7. What was the fundamental nature of the pre-colonial landscape? p. 31
8. How does Cronon argue that time is important in understanding the colonial landscape? p. 32

Chapter 3 – Seasons of Want and Plenty
1. How were colonists misleading? p. 34-35
2. How well did the colonists understand how the Indians lived in the ecosystem? p. 37
3. What is “the paradox of want in a land of plenty?” p. 41
5. How did Indians shape the environment? p. 48
6. Why did fire play an important role in the New England environment? p. 50-51
7. What role did gender assumptions play for Europeans? p. 52
8. How did environmental use relate to conquest for Europeans? p. 53

Chapter 4 – Bounding the Land
1. Were Indians actually poor? p. 55
2. How does Cronon related conquest and European views about Indian ecosystem management? p. 57
3. What are the issues relating to Indian conceptions of property ownership? p. 58-59
4. How does Cronon explain European understandings of Indian property accumulation? p. 62
5. What did Indians see themselves as owning? p. 65
6. What did Indians understand they were selling to Europeans? p. 67
7. What does Cronon argue about Indian and European property systems? p. 69
8. In what fundamental way did Indian and European differ regarding property ownership? p. 72
9. What prompted colonists to change the ecosystem? p. 77
10. What does Cronon argue about colonists and an economy that changed the environment? p. 79
Chapter 5 – Commodities of the Hunt
1. What was the initial impact of disease on Native Americans? p. 85
2. How did social disorder complicate disease impact? p. 88
3. Why did Indians seek out trade? p. 94
4. What was the significance of wampum, and who valued it? Why? p. 96
5. What was the impact of trade on Native Americans, ecologically speaking? p. 99
6. How did changes in hunting practices change the environment for both Indians and Europeans? p. 101
7. Why did availability of game animals for Indians change? p. 105
8. What are some of the types of ecological changes caused by beaver hunting? p. 106

Chapter 6 – Taking the Forest
1. What kinds of uses did Europeans have for timber, and why? p. 109
2. Why did the forests initially encountered by Europeans change? p. 111
3. Why did various tree species disappear, and who, if anyone, noticed? p. 113
4. Who changed the forests? p. 114
5. What control methods did the colonists use, and how well did they work? p. 116-118
6. How did European travelers react to colonial wood use? p. 120
7. What was the relationship between the weather and the forests, and how did they influence each other? p. 122-125

Chapter 7 – A World of Fields and Fences
1. How did Indian and European agriculture differ, and how were they the same? p. 128
2. Why were livestock significant? p. 129
3. What did a fence mean? How did a fence impact livestock? p. 130-131
4. What prompted the redrawing of the New England map? p. 135
5. How were pigs an issue in New England? p. 136
6. Where did weeds come from? p. 142
7. How did livestock affect the soil? p. 146-147
8. What was soil exhaustion and how did colonists fight it? p. 150-152
10. What was the most serious threat to English crops and why? p. 154

Chapter 8 – That Wilderness Should Turn a Mart
1. How does Cronon explain the changes in the New England environment between 1600 and 1800? p. 160-161
2. What are the dangers of a two-point analysis? p. 161, 164
3. What are the two ecological contradictions that Cronon describes? p. 169
