

Why Implement a Sustainability Plan

Why Implement a Sustainability Plan

- Save More
- Make More
- Attract More
- Put Less at Risk

- Better future for children & grandchildren

Why Implement a Sustainability Plan

Business

- Reduce expenses through energy efficiencies, waste reductions, transportation improvements, etc.
- Market place differentiation: maintain /acquire market share
- Minimize risk associated with energy price increases
- Spur innovation

Employees

- Current Employees: Provides motivation and assists with retention
- Prospective Employees: Assists with attracting quality talent
- College Graduates: Environmental and social responsibility more critical

Competition

- Encountering same benefits, risks, and influences
- May be lobbying government for greener /stringent legislation

Why Implement a Sustainability Plan

Customers

- Requiring Green Products
- Seeking out Green Products
- Avoiding Non Green Products

Government

- Federal Legislation:
 - Consolidated Appropriations Act of 2008 – Mandatory GHG Registry
 - Pending Legislation: Cap & Trade and Significant Carbon Reduction Goals
- State Legislation: Ex. California: Other States are Following
- Local Legislation: Expedited and Reduced Cost Permits for Green Project

Shareholders

- Prevalence of Green Indexes: Dow Jones Sustainability Index
- Increase in Capital Flowing to Green Technology

Why Implement a Sustainability Plan

Non Governmental Organizations (NGO)

- Lobbying Government for Change
- Teaming up with Corporations to Endorse Specific Brands
- USGBC: Waiving Registration Fees for Platinum Buildings

Suppliers

- Encountering the Same Benefits, Risks, and Influences
- Change Product Mix

Thank You!
