Next Meeting:

Getting Good And Consistent Glue-Up Results

FRIDAY September 11th, 2009 7:00 PM

The Woodworking Shop
3141 Capital Boulevard
Raleigh, NC

Several members meet at 6:00pm
Buffalo Brothers Pizza & Wings
for dinner prior to the meeting

Friday September 11th

**Subject: Getting good and consistent
glue-up results**

Speaker: Lon Schleining

Workshop: September 12th & 13th

September holds a special treat with Lon Schleining. The September general meeting, where Lon will focus on glue-up, will be on Friday, the 11th followed by a Saturday/Sunday (12th & 13th) workshop at Bob Gabor's shop near Pittsboro.

Lon is a gifted woodworker and teacher and is one of the most entertaining and personable people you will ever meet. He was one of those "kids" fascinated by machines and could weld, run a lathe and read a micrometer by the time he was a teen.

He came to woodworking fairly late in life. In 1978 he began building custom staircases in Southern CA and has since built several hundred projects. In the mid 1990's he began writing articles for Fine Woodworking and Fine Homebuilding and has over 50 articles in print. He also taught woodworking classes at Cerritos College for a number of years.

The workshops are entitled "*Woodworking 101 – an introduction for the novice... a review for the more experienced.*"

The workshops will be loaded with interesting & important subjects such as project selection, plans and prototypes, lumber selection, milling, gluing, joinery, etc. These will be in lecture and demonstration format with lots of time for questions.

Your payment assures your space. Fee is \$40 per day or \$70 for both. Participation is limited to 20 people per session so you'd better act quickly.

Host: Bob Gabor

For more information on Lon, visit his website at <http://www.woodbender.com/> For more information on the workshops see below or, contact Bob Gabor at rjgwood@mindspring.com or 919-542-5951.

See page 6 of this Newsletter for more detail.

Tuesday October 20th

Subject: Spray Finishing

Speaker: Pete Kasper

An introduction to Spray Finishing, possibly including (not necessarily in this order) surface preparation, selection of color and finish, preparation of step samples, pore/grain filling, anti-blotch conditioning/sealing, dyes v. pigments, glazing v. toning v. shading, and topcoats, concentrating mostly on water-borne finishes. We will discuss viscosity relative to various types of spray systems (conventional, LVLP, Turbine HVLP, Compressor-driven HVLP, Airless, Air-Assisted Airless) and spray gun selection and use, focusing on 3M-Accuspray guns and the 3M PPS disposable cup system.

Pete, a long time TWA member, has an extensive background in finishing starting in 1948 with brushes and rags leading up to the advance technology of a 3M PPS Large Cup H/O Pressure set up, which he used exclusively through Spring of 2009. He has now split use between that and a Mini Cup H/O Pressure set up announced in mid 2008, which he acquired in the spring of this year. He has attended numerous workshops presented by folks such as Bob Flexner and Jeff Jewitt and has been diligent in his studies and practice to polish his knowledge and talent. We will all benefit greatly from his diligence and willingness to share.

Host: Ed Mastin

Membership

If you see a colored dot on a name tag it indicates that the person is a new member, be sure to say hello and welcome them to our club.

We have 7 new members this month!

John & Vickie Aldridge of Wake Forest,

Ronald & Joyce Craig of Pittsboro,

Dirk Gale of Clayton,

Jim Lee of Cary, and

Justin Mejia of Chapel Hill

Membership Chairman: Kay Baker

About the Triangle Woodworkers Association

The Triangle Woodworkers Association (TWA) is a nonprofit educational corporation. The TWA is dedicated to teaching woodworking techniques through seminars, classes, and workshops; participants are required to sign waivers absolving liability for TWA or its designated representatives. The TWA promotes woodworking education and community interest in woodworking and in general sharing a love for wood.

The Presidents Corner

What is the collective noun for routers? You have a *gaggle of geese*, a *pride of lions* and a *convocation of eagles* but what about routers? Bruce Wrenn certainly had a lot of them for his presentation at last month's meeting and they were impressive enough to earn a collective noun of their own rather than just a bunch of routers. How about a *rotation of routers*? If you think of something better please send it in.

As usual Bruce gave a most interesting and knowledgeable run down on routers and associated jigs and his explanation of the good and not so good points of his rotation of routers (only half of his router collection apparently) was informative and valuable. Worth the cost of membership by itself. Thanks Bruce.

I heard that Bruce's router workshop on the following Saturday was very successful. It was also fully subscribed which is very satisfactory but not so good for me as I couldn't get in because I was late registering. The lesson here is to sign up for workshops as soon as they are announced – they are always well worth attending both for the practical information received and the membership camaraderie.

Thanks also to Richard Coates and Bob Gabor for bringing in their "show and tell" items – both router related appropriately. I hope this will encourage more of you to bring something in to show and take two to five minutes to tell us about it.

The Toys for Tots schedules for this season have been arranged and I will be contacting those of you who have signed up as "elves". We are short of workshop premises this year and if anyone would be prepared to let us use your shop for two or three Saturdays – or mid week – for toy making I would be most grateful. Generally we would be bandsawing, drilling, routing, sanding and assembling. We will provide all the material, the management, coffee and donuts.

This month's speaker is professional woodworker and author Lon Schleining who will explain how we can achieve good and consistent glue-ups. Lon has been our guest speaker on a couple of previous occasions and has always entertained and informed us admirably. This time will be no exception, so come early, bring a friend and enjoy an evening of erudite sawdust related discussion. I look forward to seeing you there..

Mike Reddyhoff: President

Minutes from the TWA meeting August 19th, 2009

Attending: 77

Visitors:

John Aldrich, Wake Forest
Gerald Creo, Raleigh
John Zatti

Business:

Mike Reddyhoff

a. **Elections**, Mike conducted the annual election. Kay Baker and Mike Resaw are retiring from the TWA board. **Alan Campbell** and **Larry Bradbury** were elected member-at-large by voice vote.

b. **Donations**, Dick Shirk, who makes scenery for Raleigh Little Theater, has donated a huge number of magazines (WoodSmith, ShopNotes), videos and books. TWA is selling these at \$7/binder full or individual copies for \$0.25. Proceeds from this sale will go towards a fund for an electronic projector. Currently Bayleaf Fire Station loans us a projector.

c. **Hal Liberty** Unit Commissioner for the Boy Scouts of America, talked about the Camporee scheduled for October 9-10 in Carthage, NC. The theme will be "Nature, Ecology and Conservation". There will be 1000-2000 Cub Scouts there. The BSA needs "tree cookies" which are cross sections of tree limbs of approximate dimensions 3/8-1/2" thick, 2-3" diameter and cut on the diagonal. These will be instructional for the Scouts. He asks that members make some of these cutouts. Call him at 919-624-8444 or email him at scouter@nc.rr.com to pick them up. The Scouts also have a merit badge program for woodworking and could use some mentors in this respect. Check out this site: <http://meritbadge.org/wiki/index.php/woodwork>.

d. **Kay Baker** has divided light kitchen cabinet door frames to give away. These would make great wall hung mirrors.

e. **NCSU Craft Center** George Thomas at the Craft Center is selling the humongous planer (24") and the jointer (about the size of an aircraft carrier!) since these are pre-URL and can not be used in the remodeled shop there.

f. **Toys for Tots** Mike Reddyhoff is looking for two more volunteers to host Toys for Tots workshops this fall.

Show and Tell

a. **Richard Coates** demonstrated projects he had made with a CNC routing machine, the ShopBot, from Durham.

b. **Bob Gabor** showed an occasional table, shaped principally with a router.

Lon Schleining Workshop

Bob Gabor announced that 14 have enrolled for this workshop and they have space for 20. This will be a 2 day workshop preceded by a Friday program by Lon Schleining, noted woodworker and author. The workshop will be on September 12 and 13. costs will be \$40/day or \$70 for the weekend. The location will be Bob Gabor's workshop just west of Jordan lake off Hwy 64. The program is billed as "Woodworking 101: an introduction for novices and a review for the experienced".

Program:

Mike Reddyhoff introduced **Bruce Wren**. Bruce gave a fascinating and comprehensive talk on all things routers. Bruce talked about the history of the development of routers, their "genealogy", tip on router features to look for, and many useful router jigs. As usual, Bruce's talk was very informative.

Respectfully submitted: Bill Anderson, Secretary

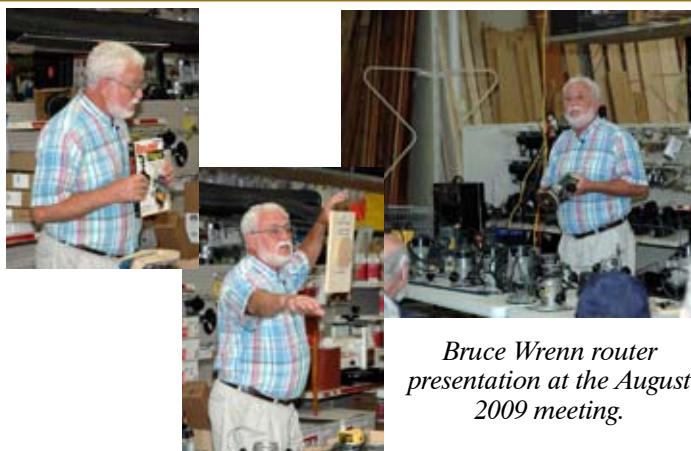

TECH Shop Durham

At last month's meeting, new member Ron Craig made reference to TechShop Durham in connection with CNC Routing. TechShop is a 25,000 square-foot membership-based workshop in Durham that provides members with access to tools and equipment, instruction, and a creative and supportive community of like-minded people so you can build the things you have always wanted to make. TechShop is designed for everyone, regardless of their skill level and it has the following facilities: Woodworking, Sewing, Metalworking, Welding, Foundry, Plastics, Electrical/Electronics and Vinyl Graphics.

The woodshop is very well equipped and includes a CNC router (ShopBot), similarly the metalworking shop with a milling machine and a surface grinder.

Monthly and annual memberships are available and instruction classes are regularly offered.

TechShop's web page gives a link to Triangle Woodworks Association so we thought it only fair to link to theirs. www.techshop-durham.com. It is worth checking out.

Bruce Wrenn router presentation at the August 2009 meeting.

UPCOMING WORKSHOPS

EDWARDS MOUNTAIN WOODWORKS

fine handtool woodworking: creating and teaching in wood

<http://www.edwardsmountainwoodworks.com>

Please note: Members of TWA, WGNC, MWTCA and EAIA are eligible for a discount on workshop fees.

Classes are limited to a maximum of 3 people and generally are intensive exercises on a topic, lasting one or two days from 9 am to 5 pm. Each student has their own workbench. A tool list and a class manual accompany each class. Lunch is provided each day. One day workshops are \$80 and two day workshops are \$160. Generally, all tools and materials are supplied, though there may be an additional materials fee for some classes.

All About Scrapers.

August 29

We will cover the complete range of card scrapers and scraper planes, how to adjust these tools and how to get the best results from them. Learn to sharpen and adjust scrapers to apply a smooth surface to your work. We will make several useful jigs for use in preparing card scrapers for use.

Handtool Sharpening.

August 30

Hands on experience with a range of sharpening media (waterstones, oil stones, sandpaper, etc) and techniques to sharpen planes blades, chisels, spokeshaves, curved bladed tools and other handtools. Bring your own tools or special problem tool to be sharpened.

Traditional Bench Jointer Plane.

Sept 19-20

Make a 22" close-handled bench plane using traditional tools such as mortise chisels, floats, and curved rasps. Students will fit a traditionally forged plane blade and use the plane to prepare edge joints for glue up.

Additional units of these classes will be scheduled if there is sufficient interest

Sharpening and Using Handsaws.

tba

Hands on experience sharpening rip and cross cut handsaws. We will explore the anatomy and purposes of various types of handsaws, how to clean up and restore handsaws. We will look at various types of jigs and gauges useful for sharpening, and evaluate different types of sawsets. This workshop is conducted at the Woodcraft Store, Raleigh NC. We will spend part of the day developing handsaw skills using rip, crosscut, dovetail, tenon, and Japanese saws.

Traditional Toted Smoother.

tba

Make a close-handled coffin-shaped smoothing plane using traditional tools such as mortise chisels, floats, and curved rasps. Students will fit a traditionally forged plane blade and use the plane to smooth a panel.

Bench Plane Skills and Techniques.

tba

Explore the range and usefulness of bench planes for handtool woodworking. Hands-on experience will cover scrub, smooth, jack, try, fore and jointer planes and all types of block planes. Restoration, sharpening, tune up of planes is covered in detail. For students taking the Special Planes workshop, we will dimension lumber for a project to be completed in that workshop.

Upcoming Events in 2009

Summer 2009	Skills Building	Shaker side table hosted by Mike Reddyhoff
Summer 2009	Skills building	Scroll saw basics hosted by Scott Miller
August 18	Monthly meeting	Optimizing your router by Bruce Wrenn
August 22	Workshop	Router workshop by Bruce Wrenn
September 11	Monthly meeting	Getting good Glue Joints by Lon Schleining
Sept. 12-13	Workshop	WoodWorking 101 by Lon Schleining at Bob Gabor's shop
October 20	Monthly meeting	Spray finishings by Pete Kasper
November 17	Monthly meeting	Furniture design & construction by Jim Kirkpatrick
November	Skills building	Basic Marquetry workshop by Norman Veit
December 15	Monthly meeting	Toys for Tots & Show and Tell

Toys for Tot's

This year we will again have several formal workshops and these are summarized as follows:

Mark Keglers' shop – Jim Kroeger will be in charge of producing 150 off-road trucks that he has designed, Larry Kendrick will be in charge of completing about 100 trucks from part sawn material we had left over from last year, Mark will be in charge of producing 100 school buses but we need assistance from someone to drill for windows. Mark is also looking after the initial preparation of all material. **Jim McNeill's shop** – Jim will be in charge of producing 100 race cars. **Larry Bradbury's shop** – Larry will be in charge of producing 50 doll beds. This is a design that Bob Gabor introduced some years ago and will be something for little girls. The beds will be complete with mattresses and we are soliciting the services of willing sewers (hint hint). **Cecil Raynor's shop** – Cecil will be in charge of producing 50 pull-along wagons that were introduced last year. We may need the services of a school or Scouts to add stencils. **Terry Tenhouse's shop** – Terry will again be in charge of producing 50 step stools from oak harvested and supplied by Jim Kroeger. **Diane and Sue's shop** - Diane Philyaw and Sue Eckard will be in charge of producing a variety of toys. We don't know exactly what yet but they are always novel and very plentiful. **Kling-spors' Woodworking Shop** – Someone (yet to be decided) will be in charge of producing a vast number of small vehicles from blanks prepared by Pete Hodges. **Ken Weeks** has kindly offered to provide off cuts of 2x4 material from (better not ask). **Scott Miller** is responsible for materials supply as needed – wheels, axles, sheet goods etc. Mike Reddyhoff is handling the scheduling of the several workshops and Fred Ford is as usual providing the pastoral care and avuncular oversight of the project.

In addition to the formal workshops that members can volunteer for, several members are preparing their own ranges of toys in their own shops and we encourage everyone to produce something.

For the Love of Wood A Lesson On Termites

Recently I have been working on a garage/shop makeover. One of the first things I did was to remove my original built-in work bench. Before doing so I took a few pictures with the idea of selling it. On the bottom board against the back wall I noticed some dark streaking and on examination it was a little soft. The bench had to come out in pieces and wouldn't you know! **Termites!!** There were a number of tunnels going up the brick foundation but stopping a few inches before they reached the top. The next day the termite man came to do his inspection and treatment. For several years people have commented to me that I was going to attract termites by having all that wood. I was very relieved to find out from the termite man that actually I didn't attract the termites with the wood. He said that the termites were there anyway and if they had not been eating my workbench they would have been eating the house. So in the end, I didn't mind sacrificing the workbench and we can all keep our wood (but have your house kept up with termite inspections).

Membership Renewals

The membership for 2009 was at 187. Currently we have 133 and with 5 new members that would mean that 49 members have not renewed their membership for 2010. An email was recently sent out with an attachment of the *Active Member List* so that everyone could check to see if their name was on it. I had numerous responses for telephone -and email address changes. If you are not sure of your status or have contact information changes please contact me at kdbakerkdb@yahoo.com or by phone at 696-8504. Membership dues greatly affect the budget for TWA so it would be really good to complete this process expediently. If you know you have not completed the dues process for 2010 simply make a check out to TWA and mail to the address on the membership renewal form.

Thank you for your support of TWA

Membership Chairman: Kay Baker

Woodworking 101 with Lon Schleining

An Introduction for the Novice; A Review for the More Experienced

Saturday, September 12th & Sunday September 13th

Start time: 8:30am – Finish: 4:30pm

Bagels and Beverages starting at 8am.

Dutch treat lunch will be brought in from Jersey Mikes or bring your own.

Saturday AM Safety, Design, Joinery, Hand Tools

Setting Up Shop

Choosing a Project; Or having it Choose YOU

Design & Draw a Project -- Ready... FIRE... Aim!

Handling Wood Movement

Choosing Between Joinery Options

Getting Organized

Selecting Lumber

Saturday PM Hand Tools and Portable Power Tools

It's All About the Tools

Making Hand Tools Actually WORK

Drills and Drivers

Sanding Strategies

Working with the Router - Move the Wood or Move the Router?

Sunday AM The Table Saw

Working with the Table Saw

Milling Lumber to S4S (S3S)

Cutting Lumber for Edge Gluing

Edge-Gluing Demo using Clamping Cauls

Sunday PM Q&A

Hardware installation

Mortise a hinge and learn how to size pilot holes for screws.

For more information on the workshops

contact Bob Gabor at:

rjgwood@mindspring.com or 919-542-5951

TWA Mentoring Program

The purpose of this program is to have a reference guide of whom to call when you need to “pick someone’s brain”, because Rule #1 in woodworking: *nobody has a commodity on brains!* This list of people will include: all contact information provided, projects they have built and are comfortable offering advice about, and skills they feel they would be able to help with.

If you are interested in being on the mentor list, and willing to help a fellow woodworker discover answers to their questions about their own projects, and have not already signed up, please complete the Mentoring Program form and bring it to the next TWA meeting. This does not require much of your time and who doesn't like to kick ideas around or be asked for advice on something you may have knowledge about after all.

Mentors

Mentor	Service/Skill Offered
Bernie Bogdon	Relief Carving
Hugh Fish	Chairs, Joinery, Machinery & Power Tools, Mantles, Routers, Tables and TV Cabinets, Turning
Pete Kasper	Bench-Storage, Hall Tree, Staining/Spray Finishing, Touch-up/Color Matching
John Margeson	Baby furniture, Beds, Bookcase, Chairs, Chest, Decks, Tables
Scott Miller	Compound Cutting, Scroll Sawing
Mike Resar	Baby furniture, Beds, Bookcase, Cabinets, Chest, Drafting, Dressers, Tables, TV Cabinets
Norman Veit	Angled/Spayed Joinery, Bent Laminations, Veneering
Allen Campbell	Simple inlay, Staining/dyeing, Pen turning, Cabriole legs
Cecil Raynor	Joinery, finishing, tables, chairs
