Thanks Lee. I just wanted to be sure as I just got another email on the topic from Andrew Kole. Apparently Susan has enlisted him in the cause.

Of course that should make things louder instead of quieter....

Let's not bother Jerry until the snow issue is resolved, I agree. They are doing a great job w/ little thanks and don't need another burden.

Jack

CJ, could you please set up a meeting with Brian Nichols as soon as you both can, and see if Linda Consuegra also wants to attend, and see if there are other ideas, who should do what? We can do the Channel 11 thing (with Sally's help, probably!), and maybe the flyer. I think the PD feels that the decibel meters will make it MUCH easier to enforce, because they will be able to be confident of what the reading is, and able to show it to the offenders. So I think there will be a noticeable increase in enforcement ability, with the understanding that if they have crime and accidents, those will take precedence. I don't know if they'll want to publicize a dispatch # for people to call, or if that will even be necessary.

Jack, signs will go up when Jerry gets unburied from snow removal, so maybe May, but I think that's before we get many riders so should be OK... flyers we could have ready when the riding season starts, and decibel meters are already in place. I think the PD would have to weigh in on how it could be possible to step up enforcement if necessary - but I think right now they respond to any complaints they can get to, and it might be ineffective for them to go around looking for loud cycles - because they are so few... but they can answer that.

CJ, could you work with Sally on PR and also ask Jerry if he can put up a pole east of town and put the 2 signs up once he is able to catch his breath? (The one on the west end of town would replace the existing one.)

CJ, maybe an update to Council after you meet with Brian would be good, or to let them know any new plans you all come up with?

Thanks, Lee
