David

If what you say is so regarding idling (and I've no reason to doubt you)-the old regs and other city ordinances cover this. Call Environmental Health and Engineering the next time this occurs. 920-5000.

Frankly David I don't appreciate the tone here. Are you frustrated? I'm sure you are- perhaps rightly so, perhaps not. No one ever claimed these regs were going to be retroactive and no one promised you they would be. The owners of the Limelight have some rights here too.

And I don't know where you live but I imagine it is in some structure that was constructed sometime and most likely caused some inconvenience to someone. So I think a little understanding is in order.

And unfortunately, this is not the only issue before city council.

Regardless, last night council decided to direct staff to draft an ordinance that would make all projects in the city conform to the new regulations and have it take effect in 30, 60, or 90 days. We will have first and second reading and be taking public comment and then deciding whether or not to pass the ordinance.

This way, all the concerned interests will be able to make their concerns known. You as well as owners of redevelopments and contractors, etc.

I encourage you to participate in the public process for this ordinance and to encourage those of your acquaintance who think similarly to do likewise.

I'm happy to read your emails and do what I can with your valid complaints. I'm not however going to stand for snide, misplaced comments and criticisms directed at staff when your complaint is unable to be immediately attended to.

If you would prefer to discuss this over the phone or in person, please contact me at 948-9874.

Regards

Jack Johnson
