

GDPR COMPLIANCE ASSESSMENT SERVICES

The European Union **General Data Protection Regulations** known as the 'GDPR' will come into full force and effect on 25 May 2018.

Any organization that holds data on a resident of the European Union will fall under the jurisdiction of the new GDPR regulations.

This includes associations, as well as many of the companies and services they use; membership database systems, event registrations, social media, payment gateways, etc.

While the risks may be considered as low, penalties for a violation/non-compliance are high; fines can be as much as 20,000,000 Euros (approx. \$23,500,000) or 4% of Global Turnover, whichever is **greater**.

A lot of information is available about **what** the GDPR is, but there is little guidance or direction for associations on **how** to achieve compliance.

GLOBALSTRAT, working together with the experts on GDPR at **Cordery** in the UK, is offering associations an efficient way to identify your GDPR compliance exposure.

Our 3 step process includes:

1. Intake Assessment
2. Exposure Analysis
3. Compliance Gap Report

Intake Assessment - We will conduct an interview with your team to conduct a detailed review of the processes, programs and applications your organization uses to collect, store and manipulate data that would be exposed to GDPR regulations.

Exposure Analysis - Your intake assessment will be analyzed and reviewed by the team at Cordery to map your organization's data environment against current GDPR regulations.

Compliance Gap Report - We will provide you with a written **GDPR Compliance Gap Analysis**. This will highlight areas that need additional attention or changes to processes and procedures to protect your organization.

Next Steps - Your **GDPR Compliance Gap Report** will help you understand where you have exposure and you can then decide how you want or need to make changes to achieve compliance.

Bonus: Our GDPR Compliance Assessment Services comes with a 1 year subscription to the GDPR Navigator which includes valuable resources and templates while keeping you up-to-date about GDPR compliance issues.

The **GDPR Assessment** services are offered at a fixed fee of just \$16,000 for an association.
