**Article 44. Hawai‘i County Cultural Resources Commission**

**Section 2-224. Purpose.**

**Section 19-53.1. Valuation of public utilities.**

- (a) Notwithstanding any section to the contrary, the director of finance, in determining the market value assessment of the property of the public utilities, may use the values for real property as set forth in the annual financial reports of the public utilities as filed with the Public Utilities Commission, pursuant to chapter 269, Hawai‘i Revised Statutes, as the basis for the director’s assessment, which shall be deemed prima facie correct. Due to the unique nature of the public utility and its equipment, assignment of values to individual tax map keys is not required.
- (b) For the purposes of this section, the following definitions are also adopted:
- (1) “Public utilities” are as defined in section 269-1, Hawai‘i Revised Statutes.
  - (2) “Outside plant” means public utility real property, predominantly production, transmission, collection, switching, and distribution facilities, that may consist of one or more of the following:

- (1) Land. Land values are determined by the market value approach in accordance with section 19-53.
  - (2) Public utility real property generally classed as outside plant, as set forth in section 19-53.1(b)(2), including but not limited to, production, transmission, collection, switching or distribution substation equipment or measuring, regulating, generation, storage or switching equipment or improved property is appraised on the basis of its reproduction cost new less allowances for physical depreciation, functional obsolescence and economic obsolescence, if any. The reproduction cost new is determined by multiplying reported inventory original cost by appropriate price indices and/or by multiplying physical inventories by appropriate unit prices. The rate of depreciation is a function of the appraised property’s age, estimated service life and salvage factor. Such determinations and assessments of fair market value shall be made, to the extent possible, in accordance with the annual financial reports as filed with the Public Utilities Commission pursuant to chapter 269, Hawai‘i Revised Statutes, which shall be deemed prima facie correct. For all lands of public utilities not categorized by section 19-53(a), said improvements shall be taxed at a rate assigned to the industrial classification.
  - (3) Plant; Structure. The value of improvements that are plant or structure as set forth in section 19-53.1(b)(3), including but not limited to, buildings, generating stations, gas compressor stations, switching plants, dams and reservoirs, circuit equipment, radio systems, terminals, satellite facilities, storage, wells, and pumping stations, is determined using the same methodology as is used in appraising outside plant properties.
