

# **Precision Rifle Equipment Suggestions**

## **Gloves:**

For newer or even experienced level shooters we recommend a club glove from 10pt9.com. This glove is inexpensive and comes with a shorter finger and thumb so shooters can pick up pellets easier. Later, shooters can try and test others to see if they prefer something different.

<http://www.10pt9.com/Clothing/Gloves/Support-Hand-Gloves/10-9-Air-Rifle-Jr-Glove-p403.html>

## **Slings:**

10pt9 club sling or pro sling-these are great buys for our entry level precision shooters. They are less expensive synthetic slings that will not stretch through competition. Right and left convertible.

<http://www.10pt9.com/Gear/Slings/10-9-Pro-1-Sling-p405.html>

For shooters looking to higher level competition. We suggest a Sauer adjustable. Right and left convertible.

## **Hand Stop & Swivel:**

Shooters will need a hand stop. Lowest cost is a universal from champions choice. Anchutz and Feinwerkbau make a similar stop for more money.

## **Jackets and pants:**

For shooters who are just getting started on precision class. Jackets need to fit through the shoulders and have enough room to overlap by at least 3-4 inches through the hips and chest. Get as close in the request. We will help you "fit" the jacket to your body shape. Ladies and mens available. These jackets will last you 3-4 years easily. If you order a jacket, we suggest that you order two or three at a time. It will save you time and money to order multiple sizes, and return he jackets you do not want.

Champions Choice makes an ISSF jacket:

Pants will sit in the natural waist. This means 3 inches above the hip bone. Once closed, they will help with back support.

# Precision Rifle Equipment Suggestions

High level who are considering university and beyond, in your junior year we can help you to find a custom fit.

## **Gear Bags:**

Consider getting a wheeled gear bag. REI bags are great because if damage occurs, the bag is replaceable with either a receipt or if purchased through your membership. Less expensive bags are available, however, many of us go through 2-3 bags at \$50-\$90 each before we suck it up and buy a good one.

## **Rifle Case:**

Be sure to purchase a sturdy case, with wheels, for airline travel. Having a good case means having a rifle arrive undamaged. With lesser qualities you may end up with broken sights or worse. Sights can be \$300-\$400 to replace. Many go with a Pelican 1750 Long case. Be sure it's a long. These can be purchased many places, Amazon Prime, Fred Meyers, & Sportmans Warehouse put them on sale a few times per year.

## **Kneeling Roll:**

But it unfilled and fill it 2/3 full with rice. Don't pay for the stuffing. We will have you dump it out anyway. Look for a roll with grip attached. It doesn't have to go all the way around but you will want it on one half of the surface.

## **Boots or Shoes:**

There are many types and brands available. We would like shooters to have a flat bottom shoe. Thin sole. We would advise you not to use tennis or street shoes. These can be inexpensive indoor soccer shoes, converse, or canvas shoes.

## **Rifles:**

We suggest Feinwerkbau or Anchutz. Keep in mind that with an Anchutz you will need to purchase risers. With Feinwerkbau they come standard. Make sure that whatever you purchase that the rifle has the following:

Adjustable buttplate

Adjustable cheek piece side to side, up down, angles.

# Precision Rifle Equipment Suggestions

Accessory rail on fore-end

Allen wrenches

Weights

2 stage trigger

Fill adaptor

Sights

## **Rifle Recommendations**

Feinwerkbau 700 or 800 (We recommend Feinwerkbau as the best option)

- <http://www.feinwerkbau.de/en/Sporting-Weapons/Air-Rifles/Model-800-Alu>
- <http://www.feinwerkbau.de/en/Sporting-Weapons/Air-Rifles/Model-800-X>

Anchutz 8002 S2 or 9003

If you have an Anchutz you will need to get riser blocks. We suggest a set of adjustable blocks.

Tec-Hro riser blocks:
