

Managing for Climate Change

To maintain... “An ecologically healthy Crown of the Continent Ecosystem”

March 17-19, 2014
Crown Managers Partnership 14th Annual Forum
Missoula, Montana

Management Response Options

Review and discuss specific management options for fish/aquatics and forests/fire

Prompts:

- *Digest the list first*
- *Discuss as a group*
 - *does this represent a range of options?*
 - *are there additional actions to consider?*
- *Remain exploratory - suspend judgment about what is feasible or what we “should” do*

Purpose: CMP and partners (re)engage on climate change

Inputs

- Scenarios from 2010 Crown workshop
- New information
- Techniques for thinking through actions

Outputs

- Synthesis → set of working scenarios
- Simple tool managers apply on their own
- A draft set of actions to be considered for fish/aquatics & forests/fire

Outcomes

- Greater awareness about climate change
- Leadership is empowered to act

Review Agenda

**Mon evening/
Tues morning**

- Set the Stage – Climate Change in the CCE

Tues afternoon

- Identify/Discuss Potential Management Actions

Wed morning

- Introduce Scenarios from 2010 Workshop
- Develop Scenarios – group exercise

Wed afternoon

- Explore Management Actions under Each Scenario– group exercise
- Discuss Strategies for Choosing Which Actions to Take

Congratulations Kathy Tonnessen!
