

RouteSavvy

It's your time and money. Make the most of it.

By OnTerra Systems

Fleet Optimization

Route Optimization WebService / API

The OnTerra Route Optimization Service (OnTerra RouteSavvy®) is a web service designed to optimize and improve the routing of anyone or anything once the upcoming stop addresses or geo-locations are entered. Specifically, OnTerra RouteSavvy® reduces costs by using sophisticated algorithms to optimize the driving path taken by a company's mobile assets. This path can then be optionally plotted on Microsoft Bing Maps for print out or visual confirmation.

With today's fuel and labor costs, every minute and every mile counts when you have product to deliver or locations requiring expert service. Make sure that your team and your fleet are always traveling the minimum distance every day, and even re-optimize during the day if new orders or work orders come in! Check out www.onterrasystems.com/route-planning-routesavvy/ for more information.

Reduce:

- Travel distance & time
- Fuel costs
- Operating costs

Increase:

- Productivity
- Vehicle Service Life
- Sustainability

OnTerra

INTEGRATED LOCATION SOLUTIONS

OnTerraSystems.com

Features & Benefits

Features

- Optimizes 100's of stops
- Sub-second response
- Multiple versions available
- Available as a web service
- Multiple types of optimization

Benefits

- Handles large routes
- Enables multiple optimizations
- Flexibility in implementation
- Can call from your own application
- Flexibility in use

Specifications

The OnTerra Route Optimization Service is a SOAP/XML web service that you can use with any application that supports SOAP/XML standards - including .NET, Silverlight, Java applications etc. It delivers sub second optimization of up to hundreds of stops based on proximity, including different algorithms for:

1. Round Trip
2. One Way with a defined end location
3. One way with an undefined end location
4. Best start – Best end

This service can be used in conjunction with routing services like Bing Maps to provide driving directions, route distance, and route time.

Testimonial

"RouteSavvy is simple and easy to use, it integrates well with our software, and it just works" – Rob Delbueno, Managing Partner - Southern Green Industries

"Since we've started using RouteSavvy, we have had a productivity increase of between 200-300%...and the uptime on RouteSavvy is fantastic!" – Amr Abdelwahab, IT Manager, Global Dispatch
