PURPOSE

In 2006 Apollo Parkways Primary School introduced an enrolment cap of 775 students in an endeavour to control the growing number of students electing to come to our school. Even with this cap in place our numbers have grown to 830. Numbers have now stabilized due to the restrictions that have been put in place. The introduction of an enrolment cap has over the years limited the number of positions available at most grade levels and has seen the introduction of a waiting list for some students who do not reside in our local school area (closest state primary school using Google maps) or do not already have siblings in our school.

Until 2012 all of these measures had not been applicable to Prep enrolments but this has changed for Prep enrolments since 2013.

GUIDELINES

Due to unprecedented demand for Prep places, the following enrolment restrictions and priorities are in place for Prep enrolments at Apollo Parkways Primary School.

- Prep enrolment numbers will be capped to match the number of Grade 6 students exiting the school.

- Priority placement will be allocated to students with siblings already enrolled at Apollo Parkways Primary School.

- Priority placement will be allocated to students where geographically Apollo Parkways is the closest state school to the child’s primary residence. Note. This is measured by the quickest route via road and not as the crow flies.

- All other enrolments are based on the date a completed enrolment form is received at Apollo Parkways Primary School.
