

Michael G. Fletcher

Principal

Michael Fletcher has more than 24 years of experience in the design and construction industry, and has experience in a wide range of projects. Michael's primary strengths lie in his ability to understand and integrate the needs of the client, to analyze and solve complex programmatic and construction issues, and to implement holistic strategies and solutions in simple, elegant, and efficient ways.

Michael's design approach is founded in the belief that the built environment should reflect and nurture the delicate and complex relationship between humans and the natural world. "Ecologics" is the field of study that explores this relationship, and its expression in the realm of Architecture generates new perspectives on conventional concepts of environment, space, balance and interdependence.

Michael established Ecologics Design in 2006 to advance and apply this philosophy in Architecture. Ecologics Design is a full-service architectural design firm, whose services include site analysis, programming, design, construction contract administration, and LEED certification.

Professional Education

University of Detroit, Detroit, MI

Professional Bachelor of Architecture 1990

Professional Registrations

Architectural Licenses

NCARB Certified - 1994
