S&P Mid 400 ^{††}	20.73%	9.02%	15.28%	9.13%	9.71%	10.07%

The performance data quoted represents past performance. Past performance does not guarantee future results, and current performance may be lower or higher than the performance quoted. To obtain current performance as of the most recent month-end, please call 1-800-936-FUND. Both the return from and the principal value of an investment in the fund will fluctuate so that any investor's shares, when redeemed, may be worth more or less than their original cost.

As of August 25, 2016, The Fund's benchmark is the S&P Mid-Cap 400 Index, a value-weighted index of mid-sized companies. Prior to June 30, 2015 The Fund's benchmark was the S&P 500 Index, an capitalization-weighted index of 500 Large-Cap stocks. Both indices are unmanaged and it is not possible to invest directly in the indices.

CFA® is a trademark owned by CFA Institute.

** Registered Representative of ALPS Distributors, Inc.

Lighting the Way

Current Strategy

Security Selection Criteria:

The Henssler Equity Fund purchases high-quality, individual common stocks that are generally rated at least "A" by Value Line for financial strength, "A-" by Standard & Poor's for earnings and dividend quality, or "2" by Value Line for safety. The greatest risk to many clients' portfolios is the potential bankruptcy of any company whose stock they hold. Our firm's strategy seeks to manage client risk by using established stock ratings to guide purchases.

Fund Performance:

During the quarter ending December 31, 2016, total return for The Henssler Equity Fund was up 8.09% versus the S&P 500[†], which was up 3.82%. and the S&P Mid-Cap 400^{††}, which was up 7.41%. The Fund benefited from strong performance in the Industrials, Financials and Consumer Staples sectors.

For the year ending December 31, 2016, the total return for The Henssler Equity Fund was up 13.86% versus the S&P 500[†], which was up 11.95% and the S&P Mid-Cap 400^{††}, which was up 20.73%. The Fund benefited from strong performance in the one-year period in the Industrials, Financials and Consumer Staples sectors.

The Fund experienced an intentional change in investment style from large company stocks to small- and mid-sized company stocks, according to market capitalization. The proper performance benchmark is, therefore, mixed between the S&P 500 and S&P 400 indices. Longer term returns are best measured against the S&P 500 while shorter term performance should be measured against the S&P 400.

Disclosures:

This does not constitute an offer to sell shares of The Henssler Equity Fund (The Fund). Offers to sell shares of The Fund may only be made by The Fund's prospectus. **An investor should always consider investment objectives, risks, charges, and expenses of The Fund carefully before investing. To obtain a prospectus, which contains this and other information, please call 1-800-936-FUND, write to The Henssler Funds, Inc., P.O. Box 8796, Denver, CO 80201, or visit www.henssler.com. Please read the prospectus carefully before investing or sending money.**

The Henssler Equity Fund is distributed by ALPS Distributors, Inc. All sales of The Fund shares are subject to approval of ALPS Distributors, Inc., Denver, CO or Henssler Asset Management, LLC, Kennesaw, GA.

There are risks associated with investing including possible loss of principal. The value of stocks selected for The Fund's portfolio or the overall stock market may decline over short or extended periods. Foreign investing involves special risks, such as, currency fluctuations and political uncertainty. Funds that emphasize investments in smaller companies generally will experience greater price volatility.

Morningstar proprietary ratings reflect historical risk-adjusted performance as of December 31, 2016. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating[™] based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics. The Henssler Equity Fund was rated against the following numbers of U.S.-domiciled Large Blend funds over the following time periods: 1,255 funds in the last three years, 1,106 funds over the past five-years and 814

Market Commentary

With interest rates on the rise and a new regime in the White House, the financial markets have been on the move. We saw a total return of 11.95% (including dividends) on the S&P 500 for 2016. Smaller companies added substantially in 2016. The S&P 400 Mid Cap Index^{††} appreciated 20.73%, while the S&P 600 Small Cap^{†††} added 26.46%, both including dividends.

Looking forward into 2017, we expect the environment for economic growth to improve with a change to fiscal policy brought on by a Republican President. However, the signals being sent so far have been a bit perplexing. Talk of less regulation and increased defense spending have been beneficial, but comments on actual defense contracts and the need to lower drug prices have been harmful to specific companies and their industries. Health care is almost certain to experience changes, but details are still unavailable. We are still unsure of the fine points of most proposed policy changes, but given current policies and the tidbits we know, we believe change should be beneficial overall.

Looking at market fundamentals on Mid-Cap companies, prices look a bit high relative to their long-term averages. Financial markets seem to be signaling better times ahead for corporate earnings, as is often the case during times of expansion. Prices often hover near the long-term average price-to-earnings ratio. Given current prices, earnings would have to increase by 25% to bring prices in line with historical levels, but analysts are expecting earnings to grow closer to 13%.

We will continue to monitor companies in the Small- and Mid-Cap space to identify opportunities for potential outperformance.

funds over the past 10 years. With respect to these Large Blend funds, The Henssler Equity Fund received a Morningstar Rating of three stars for the three-year period, two stars for the five-year period and three stars for the 10-year period. The Henssler Equity Fund received an overall Morningstar rating of three stars. Past performance is no guarantee of future results.

[†]The Standard & Poor's 500 Index is an unmanaged, capitalization-weighted index. Performance figures assume reinvestment of capital gains and dividends but do not include any fees or expenses.

^{††}The S&P Mid-Cap 400[®] Index by S&P Dow Jones Industries is an unmanaged, value-weighted index that measures the performance of mid-sized companies, reflecting the distinctive risk and return characteristics of this market segment.

^{†††}The S&P Small-Cap 600[®] Index by S&P Dow Jones Industries is an unmanaged, capitalization-weighted index that measures the Small-Cap segment of the U.S. equity market, reflecting the distinctive risk and return characteristics of this market segment.

It is not possible to invest directly in the S&P 500, the S&P 400 or the S&P 600.

[†]Beta is a measure of risk. It measures the relationship between a fund's excess return over T-bills and the excess return of the benchmark index. Equity funds are compared with the S&P 500 index. By definition, the beta of the benchmark (in this case, an index) is 1.00. Accordingly, a fund with a 1.10 beta has performed 10% better than its benchmark index—after deducting the T-bill rate—than the index in up markets and 10% worse in down markets, assuming all other factors remain constant. Conversely, a beta of 0.85 indicates that the fund has performed 15% worse than the index in up markets and 15% better in down markets.

Definitions of Valuations:

Standard & Poor's Earnings & Dividend Rank

This is S&P's computerized measure of common stocks based mainly on 10-year earnings and dividend performance (not to be confused with S&P debt ratings). Rankings are as follows: A+ Highest; A High; A- Above Average; B+ Average; B Below Average; B- Lower; C Lowest; D In Reorganization; NR No ranking

Value Line Financial Strength Rating

A relative measure of financial strength of the companies reviewed by Value Line. The relative ratings range from A++ (strongest) down to C (weakest), in nine steps.

Value Line Safety Rank

A measurement of potential risk associated with individual common stocks. The Safety Rank is computed by averaging Value Line's Price Stability Index and the Financial strength Rating. Safety Ranks range from 1 (Highest) to 5 (Lowest). Conservative investors should try to limit their purchases to equities ranked 1 (Highest) and 2 (Above Average) for Safety.
