

Control Test 4

Step 1: Vulnerability intelligence service provides inputs to vulnerability scanner

Step 2: Vulnerability scanners scan production systems

Step 3: Vulnerability scanners report detected vulnerabilities to a vulnerability management system (VMS)

Step 4: The VMS compares production systems to configuration baselines

Step 5: The VMS sends information to log management correlation system

Step 6: The VMS produces reports for management

Step 7: A patch management system applies software updates to production systems.
