

Extended Line of Off-Highway Exhaust System Products

Nelson Global Products, Inc. has a complete line of standard off-highway exhaust products, which includes product coverage for engine in the 8 to 50 horsepower (6 to 37 kW) range. This extended product offering complements the larger off-highway standard muffler series which covers exhaust flows up to 2750 CFM (78 M3/min) and provides Industrial Grade (12-18 dBA sound reduction) silencing ratings.

Dependable Performance

- Reduces exhaust noise and improves tonal quality
- Two silencing options: Residential and Critical
- Meets low back pressure requirements

Wide Selection

- Three body diameters with different inlet and outlet configurations
- Complete accessories for system solutions
- Complements existing off-highway exhaust standard line for complete coverage

Benefits

- Worldwide availability
- Reduced development time for OEMs
- Cost competitive in small volumes

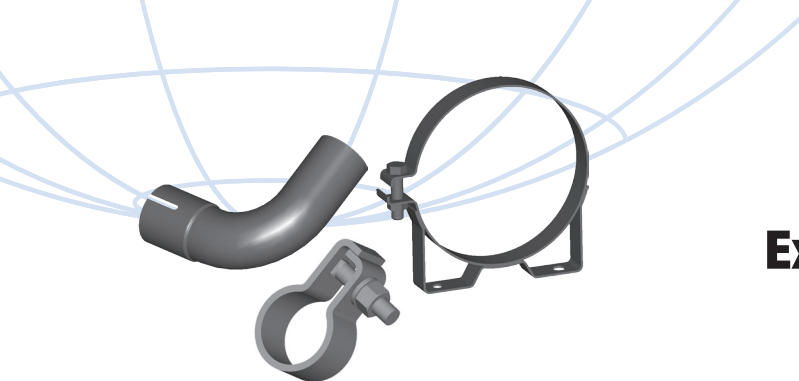

Applications

- Construction, Agriculture, Power Generation, Commercial Vehicles and Industrial Equipment OEMs

Complete System Solution

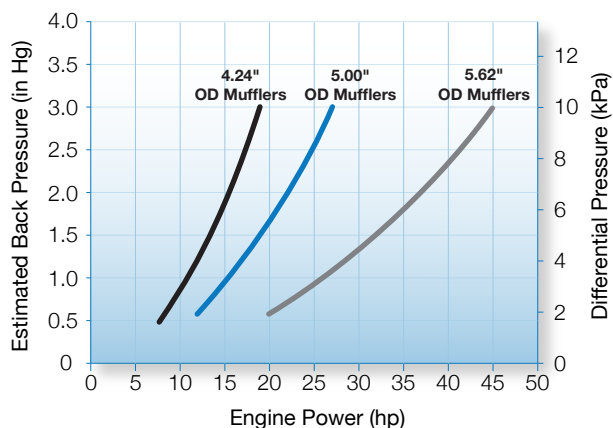

Extended Line of Off-Highway Exhaust System Products

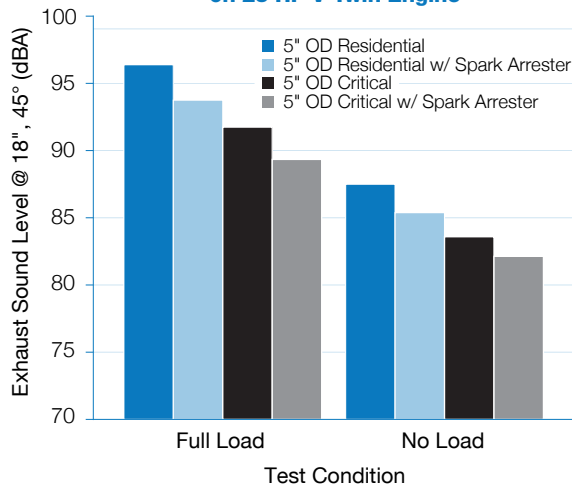

The chart below shows muffler body size based on the engine's horsepower and back pressure limit. Select a muffler body size that will not exceed the allowable back pressure limit.
