

Cambridge Report for 2026 AGM

We have continued to run sessions at Cambridge during the past year, mainly in the autumn and spring. Attendee numbers vary, with an average of 5 or 6 people per session. This includes a mix of new beginners, some beginner returners, regular improvers and intermediates. We have lost some attendees once they have completed their goals of on-snow races or other on-snow activities.

When requested, we incorporate tours on the Cambridge busway.

Several new beginners have joined to prepare for on-snow races in the 2026/2027 winter season.

While the existing stock of equipment is still serviceable, it would undoubtedly benefit from a similar update as made to Hillingdon equipment, namely to replace old SNS bindings with Prolink and buy new boots. It is also useful that the equipment is stored nearby. It is used mainly by the beginners.

A big thanks to the Club coaches involved in these events and to Club member for storage of equipment.
